

* Baud Rate Generators

Currently defined compatibles:

fsl, cpm-brg
fsl, cpm1-brg
fsl, cpm2-brg

Properties:

- reg : There may be an arbitrary number of reg resources; BRG numbers are assigned to these in order.
- clock-frequency : Specifies the base frequency driving the BRG.

Example:

```
brg@119f0 {  
    compatible = "fsl,mpc8272-brg",  
                "fsl, cpm2-brg",  
                "fsl, cpm-brg";  
    reg = <119f0 10 115f0 10>;  
    clock-frequency = <d#25000000>;  
};
```
