

sysfs-profiling..txt

What: /sys/kernel/profile

Date: September 2008

Contact: Dave Hansen <dave@linux.vnet.ibm.com>

Description:

/sys/kernel/profile is the runtime equivalent of the boot-time profile= option.

You can get the same effect running:

```
echo 2 > /sys/kernel/profile
```

as you would by issuing profile=2 on the boot command line.
