

sysfs-class..txt

What: /sys/class/
Date: Febuary 2006
Contact: Greg Kroah-Hartman <gregkh@suse.de>
Description: The /sys/class directory will consist of a group of subdirectories describing individual classes of devices in the kernel. The individual directories will consist of either subdirectories, or symlinks to other directories.

All programs that use this directory tree must be able to handle both subdirectories or symlinks in order to work properly.

Users: udev <linux-hotplug-devel@lists.sourceforge.net>
