

TechnoTrend/Hauppauge DEC USB Driver

---

Driver Status

---

Supported:

- DEC2000-t
- DEC2450-t
- DEC3000-s
- Linux Kernels 2.4 and 2.6
- Video Streaming
- Audio Streaming
- Section Filters
- Channel Zapping
- Hotplug firmware loader under 2.6 kernels

To Do:

- Tuner status information
- DVB network interface
- Streaming video PC->DEC
- Conax support for 2450-t

Getting the Firmware

---

To download the firmware, use the following commands:

```
"get_dvb_firmware dec2000t"  
"get_dvb_firmware dec2540t"  
"get_dvb_firmware dec3000s"
```

Compilation Notes for 2.4 kernels

---

For 2.4 kernels the firmware for the DEC's is compiled into the driver itself.

Copy the three files downloaded above into the build-2.4 directory.

Hotplug Firmware Loading for 2.6 kernels

---

For 2.6 kernels the firmware is loaded at the point that the driver module is loaded. See `linux/Documentation/dvb/firmware.txt` for more information.

Copy the three files downloaded above into the `/usr/lib/hotplug/firmware` or `/lib/firmware` directory (depending on configuration of firmware hotplug).
