    }
}

# This command will set OUI as 0x00041faabbff for the Vendor specific IE to
# compare with. If this IE matches the one in beacon/probe request/probe
# response
# then that IE will be stored in the data base.
set_stadb_oui={
    CmdCode=0x00f5  # do NOT change this line
    Action:2=0x0001

    CfgStaDBTlvType:2=0x0174
    CfgStaDBTlvLen:2={
        CfgOuiLen1:2=6
        CfgOui1:4=0xaa1f0400
        CfgOui2:2=0xffbb
    }
}

# This command will get the mac address of all the stas whose IEs are stored in
# the data base.
get_stadb_ie_all={
    CmdCode=0x00f5  # do NOT change this line
    Action:2=0x0000

    CfgStaDBTlvType:2=0x0173
    CfgStaDBTlvLen:2={
    }
}

# This command will get the IE data for the specific mac address requested. In
# this
# case it is 00:50:43:20:f6:a5.
get_stadb_ie={
    CmdCode=0x00f5  # do NOT change this line

```

cmd_stadb.conf.txt

Action:2=0x0000

CfgStaDBTlvType:2=0x0173

CfgStaDBTlvLen:2={

CfgStaDDMacAddr1:4=0x20435000

CfgStaDDMacAddr2:2=0xa5f6

}

}

This command will get the current comapare OUI set in the firmware.

get_stadb_oui={

CmdCode=0x00f5 # do NOT change this line

Action:2=0x0000

CfgStaDBTlvType:2=0x0174

CfgStaDBTlvLen:2={

}

}

This command will clear all the mac address and IEs for all the STAs stored in the

data base.

clear_stadb_ie_all={

CmdCode=0x00f5 # do NOT change this line

Action:2=0x0004

CfgStaDBTlvType:2=0x0173

CfgStaDBTlvLen:2={

}

}

This command will only clear the mac address and IE from the data base, if the
mac adress specifid matches an entry in data base.

clear_stadb_ie={

CmdCode=0x00f5 # do NOT change this line

Action:2=0x0004

CfgStaDBTlvType:2=0x0173

CfgStaDBTlvLen:2={

CfgStaDDMacAddr1:4=0x20435000

CfgStaDDMacAddr2:2=0xa5f6

}

}
