00-INDEX
        - this file (info on ISDN implementation for Linux)
CREDITS
        - list of the kind folks that brought you this stuff.
HiSax.cert
        - information about the ITU approval certification of the HiSax driver.
INTERFACE
        - description of isdn4linux Link Level and Hardware Level interfaces.
INTERFACE.fax
        - description of the fax subinterface of isdn4linux.
INTERFACE.CAPI
        - description of kernel CAPI Link Level to Hardware Level interface.
README
        - general info on what you need and what to do for Linux ISDN.
README.FAQ
        - general info for FAQ.
README.HiSax
        - info on the HiSax driver which replaces the old teles.
README.act2000
        - info on driver for IBM ACT-2000 card.
README.audio
        - info for running audio over ISDN.
README.avmb1
        - info on driver for AVM-B1 ISDN card.
README.concap
        - info on "CONCAP" encapsulation protocol interface used for X.25.
README.diversion
        - info on module for isdn diversion services.
README.fax
        - info for using Fax over ISDN.
README.gigaset
        - info on the drivers for Siemens Gigaset ISDN adapters
README.hfc-pci
        - info on hfc-pci based cards.
README.hysdn
        - info on driver for Hypercope active HYSDN cards
README.icn
        - info on the ICN-ISDN-card and its driver.
README.mISDN
        - info on the Modular ISDN subsystem (mISDN)
README.pcbit
        - info on the PCBIT-D ISDN adapter and driver.
README.sc
        - info on driver for Spellcaster cards.
README.syncppp
        - info on running Sync PPP over ISDN.
README.x25
        - info for running X.25 over ISDN.
syncPPP.FAQ
        - frequently asked questions about running PPP over ISDN.
