MDIO on GPIOs

Currently defined compatibles:
- virtual,gpio-mdio

MDC and MDIO lines connected to GPIO controllers are listed in the
gpios property as described in section VIII.1 in the following order:

MDC, MDIO.

Example:

```
mdio {
        compatible = "virtual,mdio-gpio";
        #address-cells = <1>;
        #size-cells = <0>;
        gpios = <&qe_pio_a 11
                &qe_pio_c 6>;
};
```
