What: /sys/class/hidraw/hidraw*/device/speed
Date: April 2010
Kernel Version: 2.6.35
Contact: linux-bluetooth@vger.kernel.org
Description:

                 The /sys/class/hidraw/hidraw*/device/speed file controls
                 reporting speed of wacom bluetooth tablet. Reading from
                 this file returns 1 if tablet reports in high speed mode
                 or 0 otherwise. Writing to this file one of these values
                 switches reporting speed.
