What: /sys/firmware/ibft/initiator
Date: November 2007
Contact: Konrad Rzeszutek <ketuzsezr@darnok.org>
Description: The /sys/firmware/ibft/initiator directory will contain
                files that expose the iSCSI Boot Firmware Table initiator data.
                Usually this contains the Initiator name.

What: /sys/firmware/ibft/targetX
Date: November 2007
Contact: Konrad Rzeszutek <ketuzsezr@darnok.org>
Description: The /sys/firmware/ibft/targetX directory will contain
                files that expose the iSCSI Boot Firmware Table target data.
                Usually this contains the target's IP address, boot LUN,
                target name, and what NIC it is associated with. It can also
                contain the CHAP name (and password), the reverse CHAP
                name (and password)

What: /sys/firmware/ibft/ethernetX
Date: November 2007
Contact: Konrad Rzeszutek <ketuzsezr@darnok.org>
Description: The /sys/firmware/ibft/ethernetX directory will contain
                files that expose the iSCSI Boot Firmware Table NIC data.
                This can this can the IP address, MAC, and gateway of the NIC.
